

# Following the crumbs

This challenge is to make sure you can find your files.

- Do you know what a file is?
- Do you know what a folder is?
- Do you know how to make a folder on your PC or Mac?
- Once you made it, can you find it?
- (Oh ... and what's a **file extension**?)

## Your challenge!

1. Create a folder on your machine your for Dojo files

2. Write down where it is — for example —

C:\Users\Shrek\Documents\Dojo\_files

3. Copy the FollowingTheCrumbs folder into your Dojo files folder.

4. Write down the full **file path** to file-extensions.html file which you can find copied folder. For example —

C:\Users\Shrek\Documents\Dojo\_files\FollowingTheCrumbs\file-extensions.html

5. Can you see the whole of the **file name** in the folder?

can you change what you see?

# Feeling brave?

Give the **file path** to the Ninja sitting next to you.

Can they find it on your machine?

Take the `file-extensions.html` file and edit it so that it has a list of file extensions and what they stand for

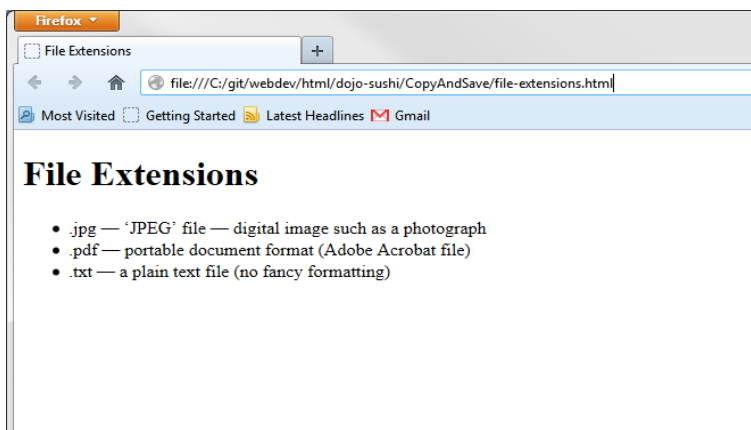

For example:

`.jpg` — 'JPEG' file — digital image such as a photograph

`.pdf` — portable document format (Adobe Acrobat file)

`.txt` — a plain text file (no fancy formatting)

Can you make it look like this?

Or even like this?
