# Shrektastic

## Level

Advanced. See if ninjas can put together all the lessons from the first three weeks and create a css-styled web page from scratch.

For ninjas who struggle a get-started template is available, though a wait-and-see approach is probably best. Suggest to a struggling ninja that they could begin by copying a page from a previous week. Also get the advanced ninjas to help the strugglers.

## Time

1 to 2 hours.

## Challenge

Create a web page describing three Shrek characters based upon a visual example on the second page of the handout.

## Progression

Create a variety of stylesheets — show how formatting can be separated from content.

Begin to introduce more advanced CSS concepts.

Leads in the Amazing Time Machine (with concept of Shrek names).

## Aims

Revise and reinforce:

- tagging
- tables
- images
- css

Force ninjas to confront a blank page! Where should I start?

## Resources

None by default.

A get-started template (shrektastic.html) and css examples (styles.css and styles-fancy.css) are available on github in the resources-for-ninjas folder.
